

# HBD-100-200 A

**Battery Energy Storage System (BESS)  
for clean and sustainable energy**

TECHNICAL SPECIFICATIONS

# HBD-100-200 A

## Battery Energy Storage System (BESS)

### What is the HBD-100-200 A?

A rechargeable Battery Energy Storage System (BESS), designed to store and seamlessly distribute instant power to multiple commercial and industrial electrical loads. The HBD BESS delivers the power to work anywhere, providing access to environments where there are challenges with grid availability and stability.

Maximise your renewable potential and experience the value of uninterrupted power!

### What can it power?

The HBD is best suited to equipment with intermittent or high current load characteristics such as tower cranes, passenger hoists, batching machines, and welders. Other common applications include remote area communities, construction site base loads, electrified plant such as cranes and earthmoving equipment plus grid stabilisation applications.

### How does it work?

This mobile and modular solution includes batteries, power conversion system (PCS), control system, battery cooling, and a fire suppression system.

It can be connected to external PV power, diesel generator and grid power. Environmentally friendly, no emissions and low noise. Reducing grid dependency, improving power supply quality and ensuring the power consumption of emergency loads.

## Why choose the HBD-100-200 A?

### Cost Saving

Reduces 80% of fuel costs

### Quiet

Suitable for residential and noise sensitive areas

### Zero Downtime

Constant uptime via ready to deliver stored energy

### Hybrid Mode

Synchronisable with other BESS, the Grid, and Diesel Generators for higher output

### Eco-friendly

100% electricity, no diesel needed

### Fast Charging

High power input

### Plug-and-play system

Industry standard connection points

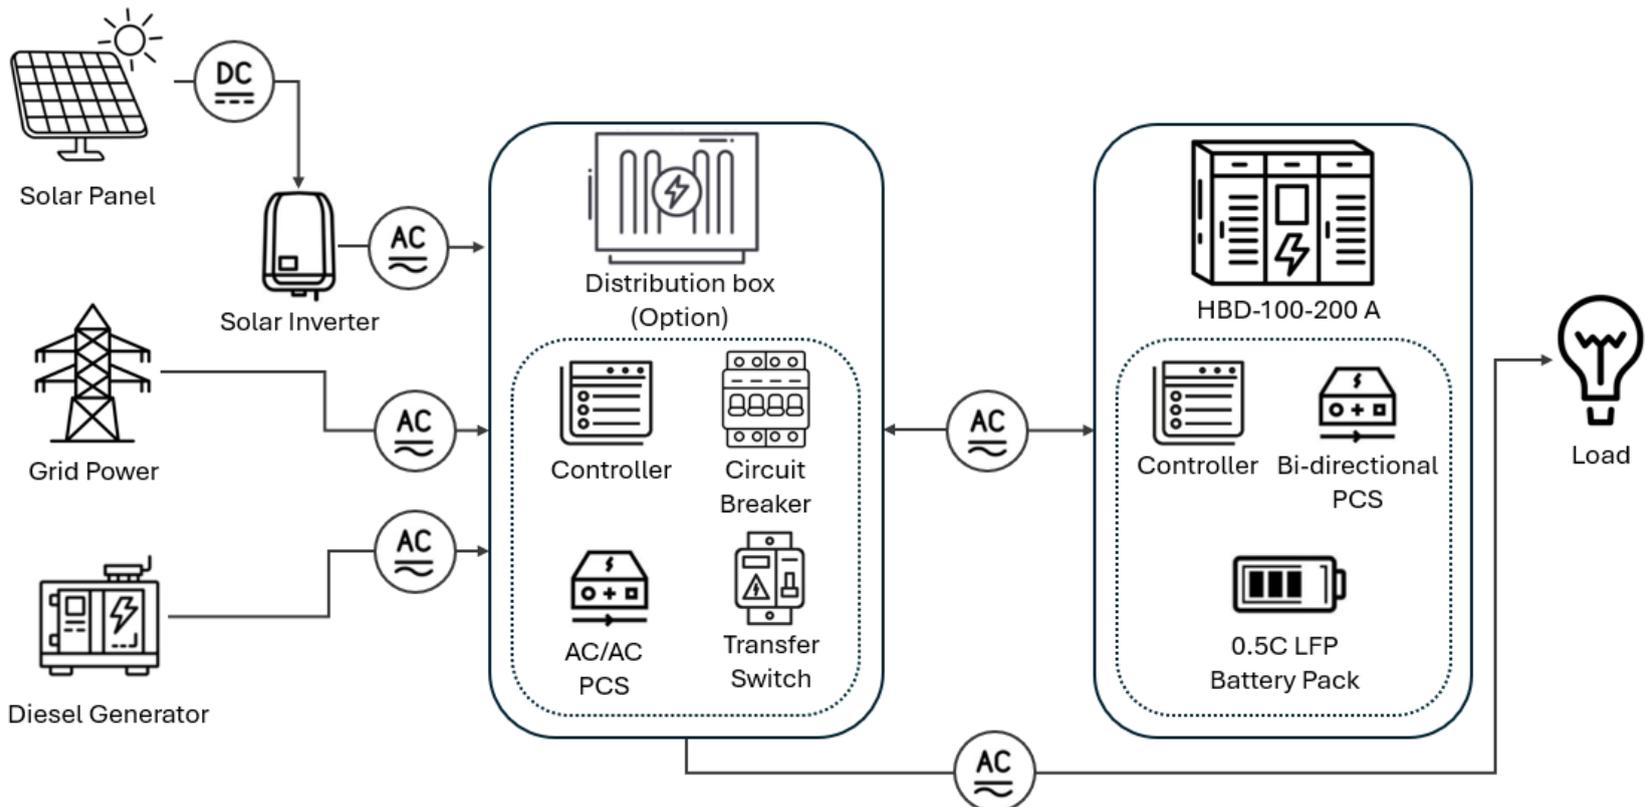

### Built-in fire-safety system

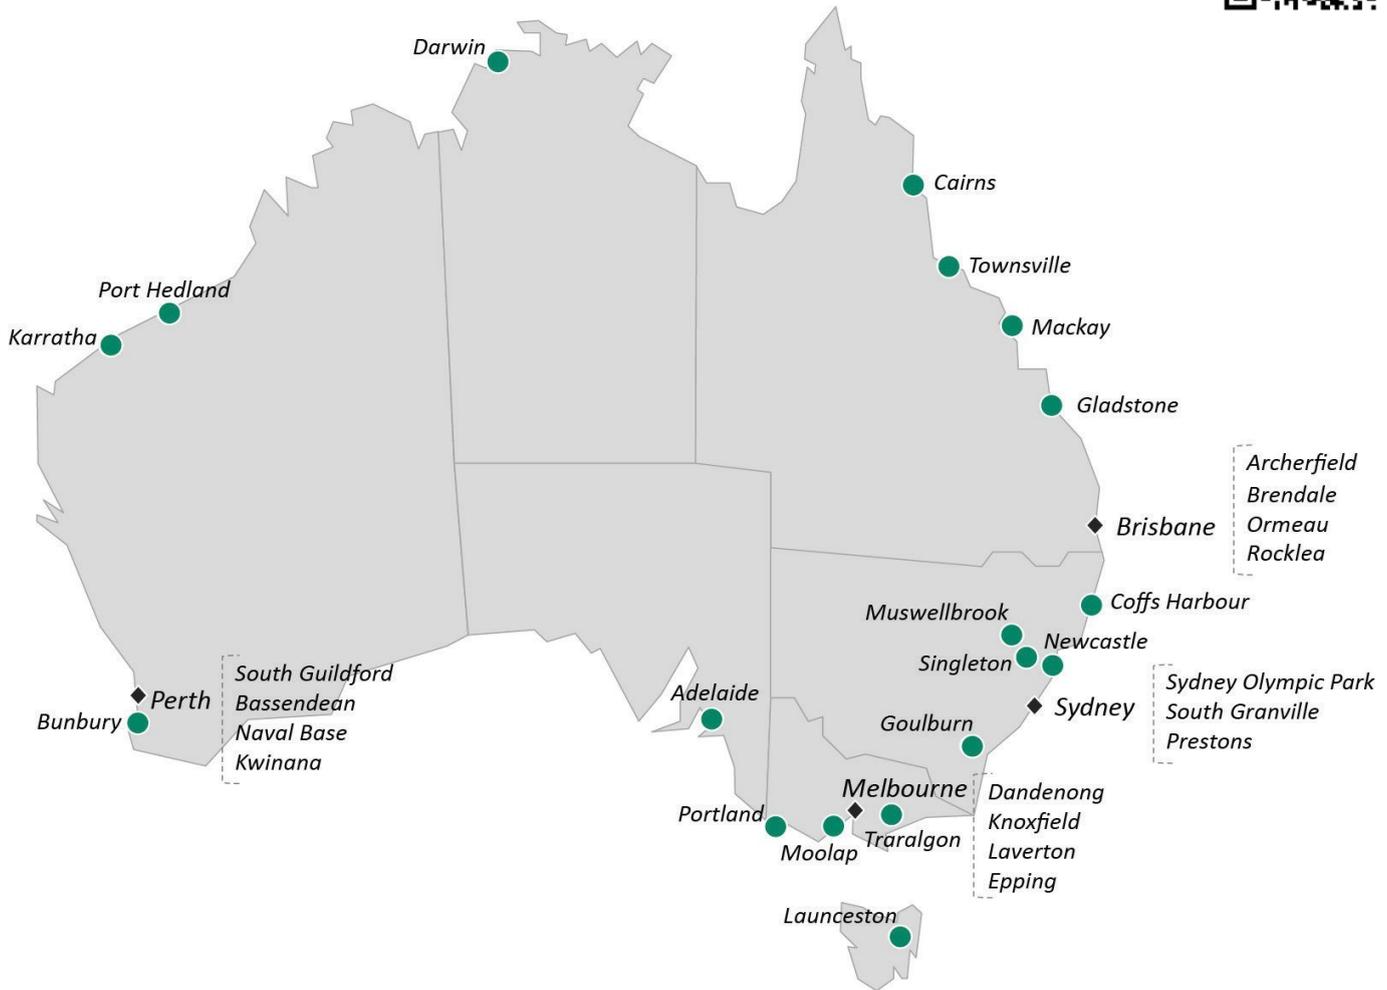

Aerosol fire suppression system with heat, smoke, and gas detection

## Specifications

Model	HBD-100-200 A
Rated Output Power@25°C	100kW
Rated Output Voltage	400V@50Hz,3ph.
Battery Storage Capacity	200.7kWh
Max. Current (AC)	167 A
Max. Output Power	116 kW
Loading Dimension(L*W*H)	1760*1321*2200mm
Weight	2600kg
Operating Temperature Range	-25~50°C
Communication	CAN/RS485
Ingress Protection	IP54
Cooling System	HVAC
Fire Protection System	Aerosol Fire Suppression (CE)
Cell Type	LFP (LiFePO <sub>4</sub> )
Expected Lifetime	> 10 years
Battery System Voltage	716.8 VDC
