

HBD-50-110 E

**Battery Energy Storage System (BESS)
for clean and sustainable energy**

TECHNICAL SPECIFICATIONS

HBD-50-110 E

Battery Energy Storage System (BESS)

What is the Tutt Bryant Power HBD-50-110 E?

A rechargeable Battery Energy Storage System (BESS), designed to store and seamlessly distribute instant power to multiple commercial and residential electrical loads. The BESS delivers the power to work anywhere, providing access to environments where there are challenges with grid availability and stability.

Maximize your renewable potential and experience the value of uninterrupted power!

What can it power?

It is best suited to power equipment in areas without a stable grid power supply, such as residential. Other common applications include remote area communities and construction site base loads.

How does it work?

This modular solution includes batteries, power conversion system (PCS), control system, battery cooling, and a fire suppression system. The scalable design supports expansion. It can be connected to external PV power, diesel generator and grid power. It can perform a seamless changeover with other power sources, supplying power in critical moments. Environmentally friendly, no emissions and low noise. Reducing grid dependency, improving power supply quality and ensuring the power consumption of emergency loads. Furthermore, charging at off-peak times effectively reduces charging costs. Real time intelligent monitoring of operational data can be achieved through the touch screen.

Why choose the HBD-50-110 E?

Cost Saving

Reduces fuel costs

Eco-friendly

100% electricity

Quiet

Suitable for noise sensitive areas, with work indicator light

Fast Charging

High power input

Zero Downtime

Constant uptime via ready to deliver stored energy

Plug-and-play system

Industry standard connection points

Hybrid Mode

Synchronizable with other BESS, the Grid, and Diesel Generators

Built-in fire-safety system

Aerosol fire suppression system with heat, smoke, and gas detection

Specifications	
Model	HBD-50-110 E
Nominal Rated Output Power@25°C	50 kW
Nominal Rated Output Voltage	380V @50Hz, 3ph (400V & 415V available)
Nominal Energy Storage Capacity	112.54 kWh
Max. Current (AC)	Discharge 125 A / Charge 125 A
Dimensions (L x W x H)	1150 x 1165 x 2135 mm
Weight	2000 kg
Operating Temperature Range	-20~50°C (>45°C derating)
Input mode	Power Grid, Solar Energy, Generators
Communication	CAN / RS485 / Ethernet / 5G wireless
Certifications	UL, IEC, IEE, EN, VDE
Ingress Protection	IP54
Cooling System	HVAC
Fire Protection System	Aerosol Fire Suppression (CE)
Cell Type	LFP (LiFePO ₄)
Expected Lifetime	> 10 years
