

Go Green Energy Metering

Profiling energy usage across your facility.

Gain real time energy insights with Tutt Bryant's power and energy logging services.

Utilising advanced data logging software and equipment, Tutt Bryant will generate comprehensive energy reports that highlight opportunities for enhancing efficiency and achieving long-term success in energy performance.

As part of the Tutt Bryant Go Green initiative, which aims to introduce innovative and sustainable products, services, and solutions, data logging seeks to increase the sustainable energy options with low or zero-carbon emitting products such as Battery Energy Storage Systems (BESS) and Standalone Power Systems.

Infinity Cube ES240 & ES450 Battery Energy Storage Systems (BESS)

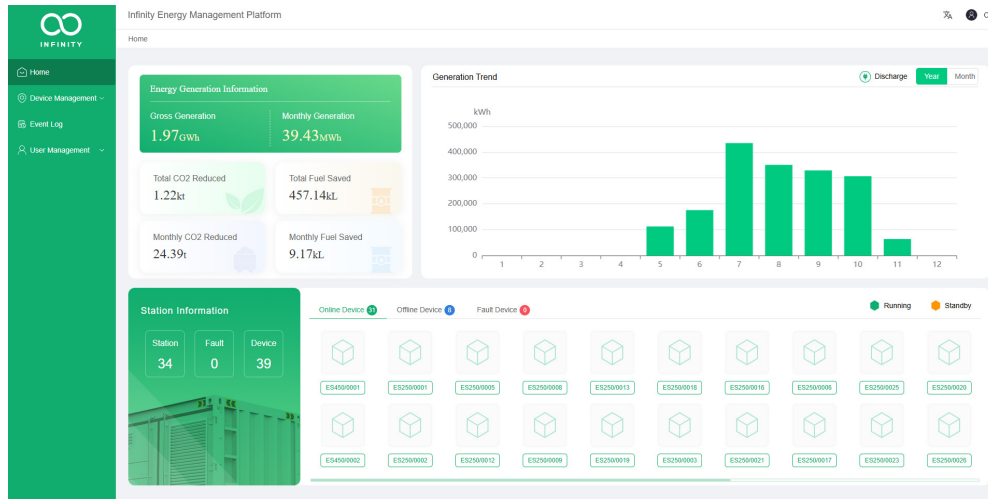

- **Real-Time Energy Monitoring** - providing energy consumption data across site assets
- **Enhanced Reporting** - highlighting areas for increased energy efficiencies
- **Enhanced Sustainable Energy Solutions** - customised strategies to optimise sustainable solutions
- **Scalable Systems** - adaptable across industries, catering to a diverse range of energy requirements
- **Sustainable Commercial Outcomes** - attract new customers / investors and open the doors to new tender opportunities with green compliance

With full three phase monitoring, our energy loggers will identify how and when your site is consuming energy, leading to the application of bespoke innovative solutions which best suit your site specific needs. Each innovative solution, designed for industries such as construction and building, health and education, resource and mining, water and waste water, will provide regulatory compliance and drive site sustainability outcomes.

The Tutt Bryant Go Green initiative is committed to working with and leveraging from, the knowledge and resources of our committed OEM partners. Go Green provides a reliable national approach, aligned with our customers sustainability targets including:

- **Energy Efficiency**
- **Plant Electrification**
- **Low Carbon Fuels and Energy Sources**
